Mr. Hans Nelson, PE  
Synergy Engineering Consultants  
6250 Jupiter Ave. NE Suite B  
Belmont, MI 49306

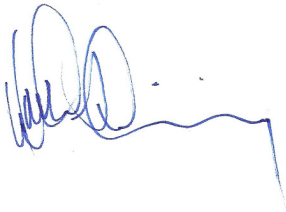

Hans,

Thank you for your work on the Philadelphia Operating Suite remodel project. Once again, I have found you and your staff to be very knowledgeable in regards to health care mechanical and electrical design. It is good to know that I can approach this health care client with confidence that you have provided a complete design of the appropriate systems for their facility. The design integrates seamlessly with the existing systems and will prove very energy efficient in operation.

It is also helpful that you are able to provide commissioning services for this project. It is crucial that the work be installed and balanced for optimum use.

Great work! I look forward to working with you again.

Sincerely,

David S Daining, AIA
